

# Material Safety Data Sheet

## *Tuberseal*

Date issued: 10/22/2010 (m/d/y)

### 1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product name: Tuberseal

Norac Concepts Inc.  
P.O. Box 31097, Guelph, ON N1H 8K1  
519-821-3633

Emergency telephone number: All hours, 613-787-5620, **ONLY** for health and environmental information.

### 2. COMPOSITION/INFORMATION ON INGREDIENTS

Hazardous ingredients	% (w/w)	ACGIH TLV	CAS No.
Mancozeb	16	Not listed	8018-01-7
Amorphous silicon dioxide	1 – 5	10 mg/m <sup>3</sup>	112926-00-8
Talc or dolomitic limestone	30 – 60	2.0 mg/m <sup>3</sup> 10 mg/m <sup>3</sup>	14807-96-6 Mixture

**Synonyms:** Mancozeb – Manzate, Dithane.**Chemical name:** Manganese ethylenebis(dithiocarbamate) polymer with zinc.**Chemical family:** Dithiocarbamate.**Product use:** Agricultural fungicide.**Registration number:** 17042 Pest Control Products Act.

### 3. HAZARDS IDENTIFICATION

**Summary:** Hazardous properties of all ingredients have been considered in the preparation of this MSDS. Read the entire MSDS for the complete hazard evaluation of this product.**Emergency overview:** May cause irritation to the eyes, skin and respiratory tract. Moisture and elevated temperatures may cause mancozeb to decompose, resulting in toxic fumes and potential fire.

### 4. FIRST AID MEASURES

**Inhalation:** Move victim to fresh air. Give artificial respiration **ONLY** if breathing has stopped. Give cardiopulmonary resuscitation (CPR) if there is no breathing **AND** no pulse. Obtain medical advice **IMMEDIATELY**.**Skin contact:** Flush skin with running water for a minimum of 20 minutes. Start flushing while removing contaminated clothing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.**Eye contact:** Immediately flush eyes with running water for a minimum of 20 minutes. Hold eyelids open during flushing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.**Ingestion:** If victim is alert and not convulsing, rinse mouth out and give 200-300 mL (1 cup) of water to dilute material. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in of vomitus, rinse mouth and administer more water. Obtain medical attention **IMMEDIATELY**.

### 5. FIRE AND EXPLOSION HAZARD DATA

**Flash point:** Not applicable.**Autoignition temperature:** No data.**Flammable limits (lower):** Not applicable.**Flammable limits (upper):** Not applicable.

**Extinguishing media:** For large fires, apply aqueous film forming foam or water in the form of a fog. For small fires, use carbon dioxide or dry chemical.

**Fire-fighting procedures:** Wear self-contained breathing apparatus and impervious clothing. Minimize the amount of water used and contain the run-off from entering water supplies or the environment by dyking.

**Other fire and explosion hazards:** Thermal decomposition may produce toxic fumes of hydrogen sulphide, carbon disulphide and oxides of carbon, nitrogen and sulphur. Dusts at sufficient concentrations can form explosive mixtures with air.

## 6. ACCIDENTAL RELEASE MEASURES

**Spills, leaks or releases:** Wear personal protective equipment. For release to land, stop any further release and spread of contamination, wash hard surfaces with detergent and water, then absorb with suitable absorbent. For release to water, stop any further release and utilize damming and/or water diversion to minimize the spread of contamination. Collect the spilled material, any contaminated soil, water and absorbent, then place in a waste container for proper disposal. Notify applicable government authority if release is reportable or could adversely affect the environment.

**Deactivating chemicals:** None known.

## 7. HANDLING AND STORAGE INFORMATION

**Handling procedures:** Use only with adequate ventilation. Avoid breathing dusts, and contact with eyes, skin and clothing. Wear appropriate personal protective equipment. Wash thoroughly after use. If clothing becomes contaminated, wash thoroughly before re-use.

**Storage requirements:** Store in a cool, well-ventilated area. Keep containers closed. Keep out of reach of children and pets. Keep away from heat, sparks, flames and moisture. Do not allow product to become wet or overheated during storage as product may decompose resulting in toxic fumes and potential fire.

**Storage temperature:** Ideal storage temperature is 10°C to 30°C. Do not expose product to temperatures above 40°C.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Eye protection:** Use chemical safety goggles when there is a potential for eye contact.

**Skin protection:** Chemical-resistant gloves and protective clothing that is impervious under conditions of use.

**Respiratory protection:** NIOSH/MSHA-approved respirator equipped with pesticide cartridges, if required.

**Other protective equipment:** None required.

**Engineering controls:** Provide local exhaust and/or adequate ventilation.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

**Appearance:** Tan powder.

**Odour:** Musty.

**Bulk density:** 350 to 450 kg/m<sup>3</sup>.

**Boiling point:** No data.

**Melting point:** No data.

**Solubility (water):** Insoluble.

**Solubility (other):** No data.

**pH:** 4.5 to 6.5.

**% volatile:** Negligible.

**Evaporation rate (ether=1):** Not applicable.

**Vapour pressure (mm Hg at 20°C):** Not applicable.

**Vapour density (air=1):** Not applicable.

## 10. STABILITY AND REACTIVITY DATA

**Chemical stability:** Stable at room temperature and storage conditions.

**Hazardous polymerization:** Will not occur.

**Conditions to avoid:** Keep away from elevated temperatures, heat and sources of ignition. Avoid moisture and humidity in storage.

**Incompatibility with other substances:** Strong oxidizing and reducing agents, acids and moisture.

**Hazardous decomposition products:** Mancozeb decomposes at 192°C to 204°C. Decomposition generates toxic fumes of hydrogen sulphide, carbon disulphide and oxides of carbon, nitrogen and sulphur. Elevated temperatures or moisture may cause the product to decompose, resulting in toxic fumes and potential of fire.

## 11. TOXICOLOGICAL INFORMATION

**Summary:** May cause irritation to the eyes, skin and respiratory tract.

### Toxicological data

#### Mancozeb

Oral LD<sub>50</sub> (rat) = > 5000 mg/kg

Dermal LD<sub>50</sub> (rabbit) = > 5000 mg/kg

Inhalation LC<sub>50</sub> (rat) = > 5.14 mg/L/4 hrs

#### Amorphous silicon dioxide

Oral LD<sub>50</sub> (rat) = 3160 mg/kg

**Inhalation:** High concentrations of this product may cause irritation to the respiratory tract.

**Skin contact:** Prolonged or repeated exposure may cause skin irritation. Mancozeb has been infrequently associated with sensitization in humans.

**Eye contact:** Direct contact may cause moderate eye irritation.

**Ingestion:** Ingestion may cause irritation to the gastrointestinal tract.

**Subchronic effects:** Sensitization is the process whereby a biological change occurs in the individual because of previous exposure to a substance and, as a result, the individual reacts more strongly when subsequently exposed to the substance.

**Chronic effects:** Repeated exposure to mancozeb at high doses affects the thyroid, liver and nervous systems and causes hind leg paralysis in test animals. The thyroid and liver effects are due to its metabolism in small amounts to ethylenethiourea (ETU). These effects are reversible when exposure is brief or intermittent.

**Carcinogenicity:** Studies have indicated that ETU has caused thyroid effects and thyroid, pituitary and liver tumours in test animals.

**Mutagenicity:** There is no evidence that mancozeb or ETU has mutagenic potential.

**Reproductive effects:** No reproductive effects have been indicated below adult toxic levels in two generation reproduction studies with mancozeb and ETU.

**Teratogenicity:** There is no evidence that this product has teratogenic potential below adult toxic levels.

## 12. ECOLOGICAL INFORMATION

**Ecotoxicological information:** Mancozeb is toxic to fish and aquatic life.

**Environmental effects:** Do not contaminate domestic or irrigation water supplies, lakes, streams, ponds, or rivers.

## 13. DISPOSAL CONSIDERATIONS

Dispose of waste material at an approved (hazardous) waste treatment/disposal facility in accordance with applicable local, provincial and federal regulations. Do not dispose of waste with normal garbage or to sewer systems.

## 14. TRANSPORT INFORMATION

**TDG classification:** Not regulated.

**Transportation emergency telephone number:** 613-787-5620.

## 15. REGULATORY INFORMATION

**WHMIS classification:** This product is registered under the *Pest Control Product Act* and is exempt from the requirements of WHMIS.

**16. OTHER INFORMATION**

The information contained herein is offered only as a guide to the handling of this specific material and has been prepared in good faith by technically knowledgeable personnel. It is not intended to be all-inclusive and the manner and conditions of use and handling may involve other and additional considerations. No warranty of any kind is given or implied and Norac Concepts Inc. will not be liable for any damages, losses, injuries or consequential damages which may result from the use of or reliance on any information contained herein. This Material Safety Data Sheet is valid for three years.
